

Scores

Criteria	Score / 20
Completeness	18
Accuracy	19
Clarity	18
Structure	18

Strengths

- The student work correctly identifies the polynomial of interpolation for the given points.
- The student provides clear and concise justifications for their answers.
- The student demonstrates a good understanding of the concepts of polynomial interpolation and Lagrange polynomials.

Weaknesses

- The student could improve their formatting and organization of the work.
- Some of the calculations could be more detailed and explicit.

Missing Requirements

None.

Final Feedback

The student work is of high quality and demonstrates a good understanding of the concepts. However, there are some minor areas for improvement in terms of formatting and calculation detail.
